Red Level Networks Signs Three New Accounts
Southeast Michigan-based IT Solutions Provider utilizes Microsoft technology

Livonia, Mich. – January 15, 2004 – Red Level Networks announced today that it has concluded the migration from the respective legacy systems for Thermal-Netics, TAG Manufacturing, and Hofley Manufacturing to the Microsoft Windows Server 2003 platform. In addition, Red Level Networks has also been contracted by these companies to provide ongoing, long-term support. Billings were not disclosed.

“We are proud to be associated with each of these companies, and to be able to enhance their infrastructure capabilities by providing them with the Microsoft Windows Server 2003 technology,” said David King, president and founder of Red Level Networks. “We hope to assist in their growth and continued commitment to quality customer service, which is something we take great pride in as a Microsoft Certified Partner.”

Farmington Hills, MI based TAG Manufacturing Company is a medium sized manufacturer of automotive and heavy truck components that services the automotive, heavy truck and defense industries. TAG has 35 employees and has been in business since 1992. They provide various types of finished machining for tier one suppliers involved with the automotive and heavy truck industries.

Roseville, Mich.-based Hofley Manufacturing Company is a privately owned, debt-free "outsource-resource specialist" that services the automotive-light truck and recreational/commercial vehicle markets. Hofley has been in business since 1940. They provide plant consolidation efforts, past model program requirements, internal capacity strain or emergency resourcing needs for tier one suppliers.

With a territory encompassing all of Eastern Michigan from Hillsdale County to Sault Sainte Marie, Thermal-Netics, Inc. has over 30 years experience as a manufacturer's representative selling highly engineered HVAC solutions. They have offices located in Flint and Berkley, and provide air conditioning systems for new and renovated medical, professional, educational, commercial, and industrial construction projects.

"We are excited about our partnership with Red Level Networks, and confident that the migration to the Microsoft Windows Server 2003 platform will provide tremendous business value and help us set the standard of superior customer service," said Tim Winn, vice-president of Thermal-Netics, Inc.
