

For Immediate Release: Red Level Networks announces their CITRIX XEN seminar featuring Citrix's XenDesktop, XenApp and XenServer better together Solutions May 12th

NOVI, Mich. – April 28, 2008 **Red Level Networks of Novi is pleased to announce they will offer a free informative seminar** featuring Citrix's XenDesktop, XenApp and XenServer better together Solutions seminar on Tuesday, May 12th. Special Guest Presenter and Citrix XEN GURU, Andrew Schmidt, will be speaking at two sessions: The Breakfast session from 8:30 am to 11 am and the Lunch Session, from 12:30 pm to 3 pm at Red Level Networks facility in Novi. Save the date and mark your calendars, please! This will be an exciting seminar featuring Citrix's virtualization solutions.

"We are pleased to present this free seminar for organizations that are looking to reduce their management and overhead costs. Implementing this solution, Red Level Networks and Citrix will show you how to make an impact through higher availability, easier manageability, more flexibility and better utilization," exclaimed David King, Red Level Networks of Novi president.

In many respects, organizations are struggling with many technical and architectural challenges while facing increasingly louder demands from the business to do things faster, better, and for less money. In terms of application delivery, IT organizations know that they must deliver enterprise applications with the highest possible availability, ensure service levels, and be prepared for a wide range of internal and external business contingencies. At the same time, companies may also be searching for ways to simplify their application delivery architecture or simply to rein in costs which have spiraled out of control due to server sprawl, heterogeneity, and management complexity. As a result, Citrix is gravitating toward new ways to reduce their operating expenses through consolidation, simplification, or just better utilization of existing resources.

This seminar will answer some of the commonly asked questions about server virtualization, provisioning, and application delivery as well as begin to articulate a strategy that you can use to successfully leverage these technologies with Citrix XenServer, Citrix XenApp and Citrix Desktop.
