

## **Red Level Networks Hosts Tech Seminar** *Experts Share Insight into Virtualization and Disaster Recovery*

**Novi, Mich.** – March 12, 2010 – IT executives from across the Metro Detroit area will gather together for an educational seminar on the latest innovations in virtualization and disaster recovery. IT solutions provider, Red Level Networks, will host an open seminar on Thursday, March 25 at 11 am, in an effort to educate local businesses on the benefits of virtualization and disaster recovery, such as the cost savings and increased efficiencies.

Red Level, servicing small and mid-sized businesses, provides managed services and customized full service IT solutions, such as virtualization and disaster recovery. Virtualization allows companies additional agility, ensuring they are able to move quickly in today's fast pace environment. It is also a cost savings for companies, allowing several operating systems to run on one machine, cutting energy costs through reducing the number of servers needed. Disaster recovery planning is also a major cost savings as it eliminates the extreme spending that will take place after an unexpected outage to a company's network. From a manmade disaster, such as a virus attack to a natural disaster, businesses must be ready with a contingency plan, ensuring less downtime after a disaster.

"As more and more products are being developed to support virtualization and disaster recovery, Red Level wants to educate IT executives on the best solutions available," said David King, president of Red Level Networks. "We offer our clients customized solutions for virtualization through VMware and for disaster recovery through DataCore, two products that provide the best results for any network and peace of mind to any IT professional."

The seminar will feature lead virtualization engineer, Robert Tessanne, discussing the importance and benefits of VMware and DataCore to any business that relies on technology. With many certifications along with years of experience, Tessanne will walk through a sample network, outlining how different products and solutions can easily be implemented to save time and money.

The seminar, including lunch, will be held at Red Level, located at 24371 Catherine Industrial Drive, suite 223, at 11 am. As seats are limited, please register to attend by contacting Todd A. Hicks at 248.412.8200 x1026 or [thicks@redlevelnetworks.com](mailto:thicks@redlevelnetworks.com).

### **About Red Level Networks**
